

Matters of the Heart

The Cardiac Lab at Littleton Regional Healthcare

The Cardiac Laboratory at Littleton Regional Healthcare offers a range of cardiac stress procedures such as nuclear cardiac stress tests and stress echo procedures to assist your physician in the diagnosis of coronary heart disease, including Electrocardiograms, wireless cardiac event monitoring, and 24-hour Holter monitoring. Our cardiopulmonary services team provides patient-centered care with state-of-the-art equipment, including one of the few accredited Echo Laboratories in the State of New Hampshire, to ensure you and your provider get the answers you need.

LRH's Cardiopulmonary services team works closely with our affiliated board-certified Cardiologists and Electrophysiologists to provide our patients with high-quality care close to home. We serve more than 1500 patients of New Hampshire's North Country and Vermont's Northeast Kingdom each year and are accepting patient referrals now.

Common Cardiac Lab procedures include:

- Exercise Treadmill Test
- Transthoracic & Transesophageal Echocardiograms
- Tilt Table test
- Exercise Stress Echocardiogram
- Cardiac CT Angiogram
- ECG Monitoring
- Exercise & Chemical Nuclear Stress Tests
- Exercise & Chemical Stress Echo Procedures
