

# Moving Forward Together

## *For Our Community*

Littleton Regional Healthcare continues to provide the expert and convenient 24-hour care you've come to know and expect.

### **Safety is Our Highest Priority**

Several enhancements are in place to ensure the maximum safety and well-being of our patients, visitors, and hospital staff. These measures include:

- Limiting entrances to only the Medical Office Building and the Main Entrance/Emergency Department.
- Screening everyone entering our facilities for COVID-19 symptoms including the use of touch-free infrared thermometers.
- Lobby and waiting rooms are sanitized multiple times each day and arranged to allow for proper physical distancing.
- Germ-zapping Xenex® robot is used to disinfect rooms of germs.
- Curbside delivery is available from North Country Pharmacy.
- Universal masking requirements for everyone in our facility.

We have exceeded CDC guidelines for the protection of our patients and staff members. For example, we are testing patients for COVID-19 before surgical procedures and routine screenings. We have also installed negative pressure isolation rooms which stop the circulation of contaminated air. Both of these measures are not required by the CDC, but steps we felt were necessary to ensure the safety of everyone in our facility.

### **Telemedicine Remains an Attractive Option**

Provider consultations are still only a convenient video chat or phone call away, saving time and travel expenses.

### **No Need to Delay Care**

Delaying your healthcare is not the same as delaying home improvements. Screenings and routine healthcare can be lifesaving. A mammogram or colonoscopy can detect cancer early when survival rates are high. Postponing treatment can lead to worsening conditions.

We look forward to continuing to provide you with trusted and convenient healthcare.
