

Moving Forward Together

For Our Community

As Littleton Regional Healthcare continues to respond and move forward in a responsible manner due to COVID-19, the health and safety of our patients and staff remains our top priority.

Safety is Still #1

As we re-open and resume important services, several key measures are in place to make our hospital even safer:

- Universal screenings with an expanded list of COVID-related questions are required for all patients, staff members, and essential patient caregivers.
- On-site, rapid in-house testing allows for timely and more informed responses.
- Twenty negative-pressure isolation rooms for our respiratory patients, which eliminates cross-contamination.
- Designated COVID inpatient and treatment areas that are isolated from all other patient areas.
- Mandatory testing of all patients before surgical procedures and for all patients who require hospitalizations.
- An adequate supply of personal protective equipment (PPE) to care for COVID and non-COVID patients.

Convenient Testing & Rapid Results

All patients are being tested for COVID-19 prior to their procedures, a measure we strongly felt was necessary for the protection of our staff and other patients. We continue to secure testing supplies to accommodate the demand for testing and have implemented a more rapid, in-house testing method. We are proud to be strategically partnered with other New Hampshire based healthcare institutions to offer widespread testing of our region. Convenient drive-up testing sites have been assembled at LRH and at a secondary location in Lincoln, NH.

Community Participation is Key!

We've all done a good job, but it is still important to exercise caution. As our community begins to re-open and travel to the area increases, the risk of exposure can also increase. Please continue to maintain social distancing and wear a mask when out in public. These measures help prevent germs from being unknowingly passed on to others. Together, we can move forward responsibly.
