

Moving Forward Together

For Our Community

Putting the safety of our patients and staff above all else, Littleton Regional Healthcare continues to do everything we can to ensure safe and essential healthcare, and to reassure our community that we are committed to moving forward together.

Smart Options, Smart Decisions

From the beginning, our hospital responded quickly and responsibly to COVID-19 by complying with state and local safety guidelines. From there, we put additional measures in place, established policies that were necessary for safe and effective care, and offered important options for patients who were concerned about safety. For example, in many situations patients now have the option to choose telehealth appointments and speak remotely with a provider by phone when in-person visits are not required or advisable. This is not only a safe alternative and more convenient, but gives providers and patients the flexibility to decide when an in-person visit is essential.

Common Sense-ability

The State of New Hampshire and our local residents have responded well by taking the virus seriously and acting responsibly. That makes our role as healthcare providers that much easier. As we move forward together, let us be patient and smart. Let us remain diligent to the simple and practical things that are working. Let us rely on our common sense. As a community, let us work cooperatively. Above all else, let us continue to practice the civic-minded values our community exemplifies.

We Will Beat This!

In true North Country spirit, we are a community that thrives because we work together! A willingness to do the right thing and look out for one another has always characterized both our hospital and our community. Please know that Littleton Regional Healthcare remains committed to doing everything possible to provide the safe and responsible care this community deserves.
